PROFESSIONAL SUMMARY

Backend Engineer with 4 years of experience in Golang, microservices architecture, and database management using MySQL, PostgreSQL, and Snowflake, dedicated to building scalable and reliable backend solutions.

WORK HISTORY

Software Engineer, 12/2022 - Current

HiFX – Ernakulam, India

- Designed and implemented a tool for API response validation in unit tests, and speeding up QA processes.
- Incorporated Clean Architecture principles to refactor existing source code, enhancing system maintainability, and scalability.
- Designed and built scalable RESTful APIs with Go, utilizing Echo, Gorilla Mux, and Go's standard net/http library.
- Contributed to the development of a CLI application for Dgraph operations, leveraging Cobra.
- Implemented the warehouse assignment strategy to optimize Snowflake query costs.
- Performed manual loading and unloading jobs for the backend service in Snowflake.
- Collaborated with the DevOps team for the deployment by developing suitable Dockerfiles and ENV variables.
- Designed SQL queries in Snowflake to power the API.
- Basic hands-on exposure to Cloud Key Management Service (KMS) and Secret Manager for securely handling credentials and encrypted data.
- Developed a scalable dynamic SQL query builder using Jinja templates, allowing payload-based query generation with O(1) template lookup for improved performance.

Software Engineer Trainee, 11/2021 - 12/2022

HiFX – Ernakulam, India

- Conducted a hands-on workshop on REST API development to enhance technical expertise.
- Developed proficiency in containerization by implementing Docker workflows and utilizing Git for version control.

Intern, 03/2021 - 09/2021

Luminar Techno Lab – Ernakulam, India (Remote)

- Data Science and Python Internship

EDUCATION

B. Tech: Computer Science, 07/2019

TKM College of Engineering - Kerala

SKILLS

- Golang
- REST API
- Python (Basics)
- MySQL
- PostgreSQL
- Snowflake
- Redis
- Docker
- AWS S3
- AWS ECS
